

MATHEMATICS OF THE USSR - SBORNIK

МАТЕМАТИЧЕСКИЙ СБОРНИК

Tom 96 (138) Nos. 1-4, 1975

Volume 25, Nos. 1-4

January-April, 1975

Pages 1-606

INDEX OF AUTHORS

Alekseevskii, D. V. <i>Homogeneous Riemannian spaces of negative curvature</i>	87
Astrahancev, V. V. <i>Symmetric spaces of corank 1</i>	129
Bahturin, Ju. A. and Ol'sanskii, A. Ju. <i>Identical relations in finite Lie rings</i>	507
Bondarenko, V. M. <i>Representations of dihedral groups over a field of characteristic 2</i>	58
Bredihina, E. A. <i>On the Lebesgue constants of some classes of almost periodic functions</i>	605
Bulanov, A. P. <i>Asymptotic behavior of the least deviations of the function $\operatorname{sgn} x$ from rational functions</i>	159
Čistjakov, V. P. See Tarakanov, V. E. and Čistjakov, V. P.	
Efimov, B. A. <i>On the cardinality of compactifications of dyadic spaces</i>	579
Fedorčuk, V. V. <i>A compact Hausdorff space all of whose infinite closed subsets are n-dimensional</i>	37
Fursikov, A. V. See Višik, M. I. and Fursikov, A. V.	
Gel'man, L. V. See Maz'ja, V. G. and Gel'man, L. V.	
Golubov, B. I. <i>On convergence of Riesz spherical means of multiple Fourier series</i>	177
Harlap, A. È. <i>Local homology and cohomology, homology dimension and generalized manifolds</i>	323
Haršiladze, A. F. <i>Manifolds of the homotopy type of the product of two projective spaces</i>	471
Il'in, A. M. and Lelikova, E. F. <i>A method of joining asymptotic expansions for the equation $\epsilon \Delta u - a(x, y)u_y = f(x, y)$ in a rectangle</i>	533
Ivrii, V. Ja. <i>Correctness of the Cauchy problem in Gevrey classes for nonstrictly hyperbolic operators</i>	365
Karimov, Z. Š. <i>On an estimate for a function represented by a Dirichlet series</i>	525
Kočergin, A. V. <i>On mixing in special flows over a shifting of segments and in smooth flows on surfaces</i>	441
Lelikova, E. F. See Il'in, A. M. and Lelikova, E. F.	
Leont'ev, A. F. <i>On the growth of an entire function of exponential type on a sequence of points</i>	567
Manovcev, A. A. <i>Inductive purities in Abelian groups</i>	389
Marčenko, A. V. <i>Selfadjoint differential operators with an infinite number of independent variables</i>	259

Maz'ja, V. G. and Gel'man, I. V. <i>Estimates for differential operators with constant coefficients in a half-space</i>	225
Nikišin, E. M. <i>Dirichlet series with independent exponents and some of their applications</i>	1
Nudel'man, A. A. <i>Isoperimetric problems for the convex hulls of polygonal lines and curves in multidimensional spaces</i>	276
Ol'sanskiĭ, A. Ju. See Bahturin, Ju. A. and Ol'sanskiĭ, A. Ju.	
Pohožaev, S. I. <i>On a class of quasilinear hyperbolic equations</i>	145
Rozendorn, È. R. <i>A sufficient condition for global regularity of nets of curves in the Euclidean plane</i>	111
Rozovskii, B. L. <i>On stochastic partial differential equations</i>	295
Rudjak, Ju. B. <i>Formal groups and bordisms with singularities</i>	487
Sačkov, V. N. <i>On extremal points of the space of symmetric stochastic matrices</i>	419
Sedleckiĭ, A. M. <i>An equivalent definition of H^p spaces in the half-plane and some applications</i>	69
Šokurov, A. V. <i>On the homotopy and homology realization of exact sequences of groups</i>	77
Tarakanov, V. E. and Čistjakov, V. P. <i>On the cycle structure of random permutations</i>	559
Višik, M. I. and Fursikov, A. V. <i>The Cauchy problem for nonlinear Schrödinger-type equations</i>	429
Zaharjuta, V. P. <i>Transfinite diameter, Čebyšev constants, and capacity for compacta in C^n</i>	350
Zak, F. L. <i>Deformations of modifications of algebraic spaces</i>	199
Žarkovskaja, N. A. <i>On the connection of the eigenvalues of Hecke operators and the Fourier coefficients of eigenfunctions for Siegel's modular forms of genus n</i>	549
